COURSEWORK

UNDERGRADUATE

Data Structures and Algorithms
Operating Systems
Database management systems
Computer Networks
Distributed Systems

SKILLS

BACKEND

REST APIs Design, Microservices
Architecture, Scala, Akka, Python, Java,
Spring boot, C, C++

DATABASES

RocksDB, CosmosDB, MongoDB,
Firebase, NoSQL

TOOLS

AWS, S3, Git, Jenkins, Docker, Kubernetes,
Grafana, Splunk, Android Studio

AWARDS AND

RECOGNITION

- Received Spot Award @Adobe, 2024
- Pat on the back Award @Adobe, 2023
- Award of Excellence for securing 1st position at zonal level @Directorate of Education, 2018

EXPERIENCE

AMAZON | SOFTWARE DEVELOPMENT ENGINEER 2

April 2025 - Present

- Designed a **geo-location filtering** library serving **100K average TPS** (200K peak) across **200+ countries**, enabling real-time content restrictions and availability checks against a 50M item catalog with **P99 latency** under **60 microseconds**.
- Introduced **dynamic text overlays** on Sports tiles across Fire TV's global user base, driving a **30% increase** in tile **click-through rate** and improving content discovery for millions of daily active users.
- Led the **migration** of Fire TV's 50M item content catalog from EMR based snapshot ingestion to incremental processing, reducing update **latency by 40%** and **saving** roughly **\$200K annually** in cost.

ADOBE | SOFTWARE DEVELOPMENT ENGINEER 2

January 2024 - April 2025

- Spearheaded personalized email headers in Adobe Journey Optimizer (AJO), processing **15-20M emails daily** and increasing **customer engagement metrics by 25%** for enterprise clients in a competitive email marketing landscape.
- Delivered the high-priority "One Click List Unsubscribe" feature to meet stringent **compliance requirements** for Gmail and Yahoo, within a **tight six-week timeline** with **zero post-launch issues**.
- Implemented a **Lease Mechanism** to transition a **single-pod** service, enforced by the workflow engine, into a **multi-pod architecture**, ensuring enhanced **uptime and reliability**.

ADOBE | SOFTWARE DEVELOPMENT ENGINEER 1

June 2022 - January 2024

- Directed the integration of **SEA tracking** tools to generate KPIs, **yielding a 30% reduction** in data analysis time; **gave knowledge-sharing sessions** to promote **best practices** among **100+ colleagues** in the product.
- Led the **Multilingual Messaging** project end-to-end, enabling **Geo-targeted campaigns** in **20+ languages**—from requirements gathering through production deployment—expanding AJO's reach across global enterprise.
- Automated the Top-Up IP configuration flow, reducing customer issue tickets and manual effort, while increasing team efficiency and accelerating time to value for customers. **Making it 95% Faster**.

PROJECTS

JOB HUNT BUDDY | LINK

- Developed a web-based platform to **help job seekers track and manage job applications** in one place.
- Integrated with **Gmail SMTP server** for email automation that allows users to **send one-click personalized job application emails** or **follow-up emails** or on a recurring schedule until response.

WEATHER APP

- Designed and developed an android application using Java to fetch and display **real time weather information** by integrating with **OpenWeatherMap API**.
- Optimized battery usage** by configuring the app to listen for location updates only after a **displacement of 250 m**, ensuring **efficient resource utilization**.
